Attendance at this promotional program sponsored by GlaxoSmithKline ("GSK") is limited to healthcare professionals only. Guests will not be accommodated. Please contact your GSK representative and RSVP by the date above if you would like to attend this program.

Some state laws prohibit GSK from providing meals to qualified healthcare professionals. In particular, Vermont state law prohibits GSK from providing meals at this event to HCPs who "regularly practice" in the state of Vermont, or to their employees or agents, even if they primarily practice in another state. Under Vermont law, "regularly practices" means practicing at least periodically under contract with, or as an employee or owner of, a medical practice, healthcare facility, nursing home, hospital or university located in Vermont.

In addition, many employers (e.g. Hospitals, Teaching Institutions, the Federal Government, States and local governments) place restrictions on what their employees may accept from outside parties as a condition of employment. GSK respects these restrictions and asks that you limit your participation to those activities permitted by your employer.

Note that GSK is publicly disclosing information regarding the monetary value of meals and related expenses provided to you as an attendee at this program and will disclose information as required by federal or state laws.

Trademarks are owned by or licensed to the GSK group of companies.
